About RILEM Annual Weeks

- RILEM Week is the annual meeting of the standing committees of RILEM (*International Union of Testing and Research Laboratories for Materials and Structures*). Such meetings occur every year in conjunction with a major international conference.
- The recent RILEM weeks were held in Copenhagen (2016), Melbourne (2015), São Paulo (2014), Paris (2013), Cape Town (2012), Hong Kong (2011).
- This year, IIT Madras is organizing the ICACMS (International Conference on Advances in Construction Materials and Systems) - as part of the 71st RILEM Week during Sep 3 - 8, 2017, in Chennai
- It provides a great opportunity to interact with some of the top minds in construction materials and systems, and get information on the latest path-breaking developments.

ICACMS Conference Themes

- Advances in supplementary cementing materials
- Concrete durability and performance specifications
- Early age behavior and rheology of cementitious systems
- Special concrete and applications
- Advances in characterization of construction materials
- Sustainable building systems
- Bituminous binders and mixtures
- Repair and conservation of heritage structures
- Corrosion control and monitoring in concrete structures
- Repair materials and repair systems for concrete structures

Conference
